

## Card Placer/Denester

The BCA Card Placer/Denester was developed to address the shortcomings of existing solutions. By replacing pneumatics with linear servo motion the BCA Card Placer/Denester is precise, repeatable, accurate and easy to set up.

Stainless steel construction and an IP67 rating allows for use anywhere in your process.

### **Standard Features:**

#### **Linear and Rotational Servo Motion**

Servo motion on all axis allows for precise positioning, smooth motion, and higher speeds than traditional pneumatic systems. Ability to precisely control speed, acceleration and deceleration delivers smooth operation without the slamming and jerking associated with pneumatics.

#### **Programmable Change Overs**

Changeover between products is as simple as a push of a button. No need to move stops, adjust air pressure change, etc.

**BOSTON CONVEYOR & AUTOMATION**

**Robust Stainless Steel Construction, with Full Interlocked Guarding**

Designed to excel even in wet environments, this cutting-edge solution guarantees maximum durability and performance.

- All food grade, corrosion resistant components assures machine can be effectively cleaned
- Welded stainless steel frame eliminates the shaking and reach-in hazard seen in other solutions

**Standard Rockwell Allen Bradley Controls**

- The BCA Servo De-nester can be configured as a stand alone machine or integrated into a system
- Includes the ability to store setup recipes to further reduce change-over time

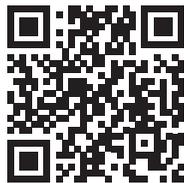

**Customized for Your Application**

- BCA will configure the Card Placer/Denester to fit in your existing process or we can provide a conveyor to meet your application needs
- Multiple units can be set up in series or parallel for high throughput applications.
- Available in single or dual head configurations

**Application Specific Tooling**

- The pick-head and product magazines are designed specifically for a given project
- Optional in-line folder for u-boards and other carriers.
